CAREER OBJECTIVE

A passionate Computer Science Engineering student committed to transforming innovative ideas into impactful technological solutions. With experience in AI-driven application development, research publications, patents, and software projects, I aspire to contribute to cutting-edge innovations while continuously enhancing my technical expertise, leadership abilities, and problem-solving skills in a dynamic and growth-oriented organization.

EDUCATION

B.E Computer Science and Engineering (Pursuing)

SNS College of Engineering (2024 - 2028)

CGPA : 8.22

HSC - 70% (2024)

SSLC - 80% (2022)

CMS Vidya Mandir Matriculation Higher Secondary School

PROJECTS

Intelligence in EV using IOT

The project Intelligence in Electric Vehicles (EVs) Using IoT focuses on integrating the internet of Things (IoT) with Electric Vehicles (EVs) to enhance their efficiency, safety, and user experience. Used IoT sensors to monitor EV performance.

Smart Equipment Monitoring & Failure Prediction System

The system continuously monitors vibration, temperature, and performance metrics to identify abnormal operating conditions. By analyzing real-time data, it predicts equipment failures before they occur, enabling timely maintenance, reducing downtime, and improving overall system reliability and efficiency.

Pyrolysis-Based Waste-to-Energy System

Developed a waste-to-energy system using pyrolysis technology to convert waste materials into syngas for electricity generation. The system promotes sustainable energy production by reducing waste, improving resource utilization, and supporting environmentally friendly power generation.

ChargeWise AI EV

Developed an AI-powered electric vehicle intelligence system that analyzes real-time driving data to optimize battery performance, driving range, and charging decisions. The system provides intelligent insights to improve energy efficiency, enhance vehicle performance, and support smarter EV management.

Smart Parking System

Developed a smart parking system that uses real-time data to identify and allocate available parking spaces efficiently. The solution reduces parking search time, minimizes fuel consumption, decreases traffic congestion, and optimizes urban parking space utilization.

AI Travel Concierge Agent

Developed an AI-powered travel concierge agent that provides personalized travel recommendations based on user preferences. The system assists with itinerary planning, destination suggestions, and travel information, enabling users to make smarter and more convenient travel decisions.

EXPERIENCE

Software Intern | SNS Square (3 Months)

- Contributed to software development by assisting in application design, testing, and debugging.
- Collaborated with development teams to improve system performance and gain hands-on industry experience.

Mentor | B.Sc. Final Year Students (1 Month)

- Guided final-year students in project development, technical concepts, and problem-solving.
- Supported students in project planning, implementation, and successful completion of academic projects.

Web Development Intern | InternPe (1 Month)

- Developed responsive web pages and implemented user-friendly interface features.
- Gained practical experience in front-end development, debugging, and website optimization.

ACHIEVEMENTS

Won first prize in national level paper presentation event conducted by PSG Institute of Technology and applied research

Won 10th rank globally on Ai Agent Hackathon conducted by Swafinix Technologies

Won First price in the Bootcamp conducted by SNS College of Engineering

Top 10 for the final round in MOBILITYX 2.0 conducted by KPR Institute of Engineering and Technology

PUBLICATIONS AND PATENTS

Journal - Synergistic Drugs Coated Titanium Dental Implants against Bacterial Pathogens

Journal - Mycofabrication of Mycelium-based leather using Pleurotus florida and Pleurotus Ostreatus

Patent - Smart Water bottle with integertaed medical box elderly care

TECHNICAL SKILLS

- | | | |
|--------------------------|------------------------------|-------------------------|
| • Python (Intermediate) | • Next.js (Basic) | • Github (Intermediate) |
| • C++ (Intermediate) | • Flutterflow (Intermediate) | • React (Basic) |
| • Node.js (Intermediate) | • N8N (Intermediate) | • Streamlit (Basic) |
| • MongoDB (Basic) | • ClustalX (Basic) | • Django (Basic) |

SOFT SKILLS

- | | |
|-------------------|---------------------------|
| • Teamwork | • Effective Communication |
| • Time Management | • Critical Thinking |
| • Leadership | • Problem Solving |

LANGUAGES

- English (Fluent)
- Tamil (Fluent)
